

SCHINDLER AHEAD DOORSHOW

INFORMED PASSENGERS.
GREAT ENTERTAINMENT.

Schindler Ahead DoorShow is the new advertisement and information solution for your elevator doors. A projector, connected to our CUBE, animates your messages on the outside of the elevator doors. Through a content management system, you can operate each projector separately and display a wide range of content.

CUSTOMIZED CONTENT

Each Schindler Ahead DoorShow can show the same or different content. Via the wireless operated content management system, content can be defined for entire buildings or a single elevator door. You can also allocate specific content for a certain duration or time of day. Any kind of content works, from animated to static.

ALL YOU NEED

Schindler Ahead DoorShow is not tied to a specific Schindler elevator. We deliver and install everything required – the projector, the special surface coating for the doors and the content management system. If you like we can also work on your preferred content.

SCHINDLER AHEAD DOORSHOW

FEATURES

Projection day and night

Special short-distance projectors installed above the doors are bright enough to work in daylight. As the projectors are linked with the door control, passengers are not dazzled.

Sleek – and vandal-proof – design

Clear door images

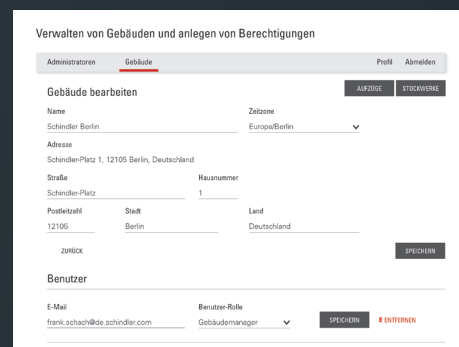

A special foil delivers bright and sharp images or animations. Depending on the surrounding illumination, the most suitable foil can be chosen.

Special foil for a sharp image

Content management

Web-based and connected via the Cube, content wireless updates are straightforward. Via a single server and interface, the content can be placed at single or multiple locations or doors respectively.

Easy content distribution

BENEFITS

Your message

Advertising or information – for passengers, staff or customers – are noticed. With this system, even long messages look good on small doors.

Extra revenue

Market your elevator doors as an innovative format for advertisements or information. Schindler Ahead DoorShow adds value for everyone.

Trailblazing technology

Video, audio, GIF, JPEG – all file formats work! The special hardware and software distribute the content to the selected projector and elevator doors. Connecting to the Adserver enables real-time messaging and advertising.
